SUMMARY

Odoo developer with a BSCS from the University of Lahore, working in Python, PostgreSQL, XML and the Odoo Web Library (OWL). At Airblue I build custom Odoo modules for helpdesk ticketing and HR attendance, including biometric device integration, multi tier leave approvals and role based access control. I came to Odoo from React, Node.js and ASP.NET Core, so I can also handle the web front end and API side of an ERP project, or work in a standalone full stack role.

SKILLS

Odoo ERP: Odoo Module Development, Odoo ORM, OWL, QWeb, XML RPC, Access Rights, Record Rules, Cron Jobs, Odoo HR, Helpdesk
Languages: Python, JavaScript (ES6+), TypeScript, C#, SQL, XML, HTML5, CSS3
Frontend: React.js, Tailwind CSS, Framer Motion
Backend & Databases: Node.js, ASP.NET Core MVC, Entity Framework Core, REST API Integration, PostgreSQL, MySQL Server
Tools & Platforms: Git & GitHub, Shopify (Liquid), PyCharm, Vercel, Railway

EXPERIENCE

Software Developer Intern (Odoo & MERN)
Oct 2026 to Present

Airblue
Internship, Management Information Systems (MIS) Department

- Work in the MIS department on internal software for Airblue's aviation operations, mainly custom Odoo modules with supporting web applications.
- **Odoo Development:** Build and configure custom Odoo modules in Python, XML and OWL for helpdesk ticketing and HR attendance and leave management.
- **Integrations:** Connect Odoo to an email parsing API and to ZKTeco biometric devices through scheduled cron jobs.
- **Web Development:** Build internal tools with React.js and Node.js when a workflow needs more than the Odoo client.
- **System Support:** Work with the technical team to troubleshoot, maintain and improve the existing MIS systems.

Tech Stack: Odoo ERP, Python, PostgreSQL, XML, OWL, JavaScript, React.js, Node.js

Full Stack Developer Intern
Jun 2025 to Aug 2025

Iron Bridge Systems
Internship, completed during BSCS studies

- Built and maintained client web applications that scored 95+ on Lighthouse and worked across all major browsers.
- Organized the codebase into modular, reusable components, which cut technical debt and sped up delivery of new features.
- Fixed front end bottlenecks and optimized asset delivery, reducing initial page load time by 20%.

Tech Stack: JavaScript, React, Node.js, HTML5, CSS3, REST APIs, Git

Shopify Developer and Website Administrator
Mar 2023 to Present

The London T
Part Time (Remote)

- Built custom Shopify storefronts with Liquid templating and JavaScript, improving UI/UX and lifting conversion rates by 15%.
- Manage store administration and third party API integrations, and reworked checkout workflows to reduce cart abandonment and page load time.

Tech Stack: Shopify, Liquid, JavaScript, HTML5, CSS3, Web Performance Optimization

PROJECTS

Airblue GEST Helpdesk System: *Enterprise Customer Support & Email Management Platform*

- Built a custom Odoo module for Airblue's customer feedback and query handling, with a role based dashboard that keeps all support tickets in one place.
- Added an email parsing integration that fetches incoming customer emails, routes them, and matches replies to the correct ticket ID in Odoo.
- Overrode core user models to set up role based access control, so admins can assign tickets to departments and agents without widening global permissions.
- Built SLA tracking for first response time (FRT), department resolution metrics and ticket age.

Tech Stack: Python, Odoo ERP framework, PostgreSQL, XML, REST/Email APIs

Airblue HRMS: *Biometric Attendance & Custom Leave Management*

- Built two linked Odoo HR modules (zkteco_api and hr_timeoff_custom) for shift tracking, attendance syncing and leave encashment.
- Integrated ZKTeco biometric hardware using scheduled cron jobs that pull raw punch data and assign shifts in the Odoo database.
- Replaced Odoo's default leave logic with a multi tier approval chain routed by job position, department and work location.
- Built Employee and Attendance dashboards with the Odoo Web Library (OWL), JavaScript and QWeb/XML.
- Set up record rules and row level security so line managers only see their own teams in HR reports.

Tech Stack: Python, Odoo ORM, PostgreSQL, ZKTeco REST API, OWL, JavaScript, XML/QWeb

SmartStock: *AI Powered Inventory Management System*

- Built an inventory management system with a machine learning model for stock forecasting, reaching 90%+ accuracy and reducing potential stock outs.
- Designed the relational database schema and backend REST services behind the analytics dashboards, with query responses under 500ms.

Link: https://smartstock-final.vercel.app/
Tech Stack: Python, Node.js, React, Relational / NoSQL Databases, RESTful APIs

RAW SPEC.: *High Performance Web Based Automotive Styling Catalogue*

- Built a full stack automotive styling catalogue on ASP.NET Core MVC and tuned Entity Framework Core queries to cut data retrieval time.
- Added an inventory management system with role based access control through ASP.NET Core Identity for admin CRUD operations.
- Designed a responsive dark themed UI with Tailwind CSS and held a 90+ Lighthouse performance score.

Link: https://car-mod-styling-production-a11a.up.railway.app
Tech Stack: ASP.NET Core MVC, C#, Entity Framework (EF) Core, ASP.NET Core Identity, Tailwind CSS, Relational Databases

Formula 1 Telemetry Platform & Pit Stop Reaction Tester

- Built a motorsport web app on the OpenF1 and Ergast REST APIs that handles 10,000+ telemetry data points per session with rendering latency under 200ms, plus a reaction tester timed with performance.now().

Link: https://pitstop-reaction-test.vercel.app
Tech Stack: React, Modern JavaScript (ES6+), OpenF1 / Ergast REST APIs, Async/Await, Tailwind CSS, Vercel

Telemetry File Corruption Tool: *Client Side Binary/File Corruption Testing Utility*

- Built a client side tool with ArrayBuffer and Uint8Array that keeps file magic headers and mutates internal XML/Deflate streams to trigger real application errors for QA testing (95%+ success rate), with a byte level hex diff inspector running at 60 FPS.

Link: https://file-corrupter.vercel.app/
Tech Stack: React 18, TypeScript, Tailwind CSS, Framer Motion, Web Audio API, Vite

Ignition: *First Car Dream Tracker and Islamic Auto Financing Platform*

- Built a car financing platform for interest free Islamic auto leasing on vehicles priced around 8.5 to 9 Lacs PKR, with an EMI calculator (vehicle price, down payment, tenure) and an animated savings progress tracker.
